

LAKE BLOOMINGTON

LAKE STATUS SUMMARY

LOCATION: Located approximately 15 miles North of Bloomington IL, Lake Bloomington is easily accessible by taking I-39 North to the Lake Bloomington Exit, then proceeding east on the Lake Bloomington Road (2500N) 4 miles.

DESCRIPTION: Lake Bloomington, a 635 acre reservoir, with 18.5 miles of shoreline, is owned by the City of Bloomington, IL and is maintained and operated by the City's Water Department. There is one public boat launch and there is a fee to use the ramp/lake. The Friends of Everbloom is an organization that assists with habitat projects and improving the quality of Lake Bloomington. To learn more about their organization, visit their web page <https://www.friendsofeverbloom.com/>

STATUS OF THE SPORT FISHERY: The IDNR currently stocks walleye, hybrid striped bass, and smallmouth bass. The following information is a summary of the major sport fisheries based on periodic fish population surveys.

Largemouth Bass – The most recent bass survey resulted in a catch rate of 59 largemouth bass per hour. The management objective is 100 bass per hour. The largest bass collected weighed 3.9 pounds. Of the bass collected over 8 inches, 43% were longer than 12 inches, and 14% longer than 15 inches. The average percent of bass over 15 inches is 20.6%. The bass fishery is rated as fair. Numbers of bass need to improve across all size ranges, especially the number of legal bass.

Walleye – Walleye were first stocked into this lake in 1984 and has received approximately 25,000 two-inch walleye every year. The most recent electrofishing survey for walleye resulted in 34.3 walleye per hour of sampling. The average catch rate for the past 18 surveys is 38.6 walleye per hour. Walleye collected during the most recent survey ranged in size from 8 inches to 24 inches. The walleye regulation was changed in 2017 to an 18-inch minimum length limit and a 3 per day harvest limit.

Hybrid Striped Bass – **The State record hybrid striped bass was caught at Lake Bloomington in 2017.** The record hybrid weighed 21.45 pounds. The hybrid striped bass fishery in Lake Bloomington is considered good.

Crappie – Both black and white crappie are present in Lake Bloomington. The most recent spring electrofishing survey resulted in the collection of 85 white crappie per hour and 35 black crappie per hour. The objective is to collect 25 per hour for each species. The black crappie ranged in size from 5 inches to 11 inches and the largest black crappie collected weighed 0.8 pounds. The white crappie ranged in size from 7 inches to 11 inches and the largest white crappie weighed 0.75 pounds.

Channel Catfish – During the most recent fish survey only 4 channel catfish were collected. The current channel catfish fishery is average in Lake Bloomington. Lake Bloomington does not receive any catfish stockings.

FISHING REGULATIONS: Two pole and line fishing only, no trot lines, jugs or bank poles.
