

Burning Star State Fish and Wildlife Area – Shop Lake

2024 FISHERIES FACT SHEET

LOCATION: Shop Lake is located in Jackson County at the Burning Star State Fish and Wildlife Area just east of DeSoto, IL.

DESCRIPTION: There are no facilities or boats ramps at this 24 acre lake. All fishing at Shop Lake and the entire site is closed from November 1 through the end of February.

STATUS OF THE SPORT FISHERY – The following is a brief summary of the major sport fish species based on annual fish population surveys conducted by the Illinois Department of Natural Resources.

Largemouth Bass – The largemouth bass population in this lake is good. During the 2023 spring electrofishing sample, largemouth bass were collected at a rate of 124 fish per hour. Of the 31 bass collected, 19% were over 15 inches and 6% were over 16 inches. No bass over 18 inches were collected. The largest bass collected in the 2023 survey weighed 2.5 pounds.

Crappie – No crappie have been collected during 4 fish surveys completed on this lake. This lake is too small to support crappie fishing. Crappie in smaller lakes like this tend to stunt and result in very poor crappie fishing.

Bluegill Sunfish – The bluegill population is stunted and poor. Only 4 of the 23 bluegill collected in the 2023 spring survey were over 6 inches and no BLG over 7 inches were collected. No bluegill over 8 inches have been collected during fish surveys in this lake.

Redear Sunfish – No redear sunfish were collected in the 2023 spring survey. No redear sunfish have been collected during fish surveys in this lake.

Channel Catfish – The channel catfish population is good. Seven channel catfish (12-15 inches) were collected in the 2023 spring survey. No channel catfish were stocked in 2023.
